ATLAS considers the following as Generative Artificial Intelligence Misuse:

1. Submitting any work for **ATLAS Conferences or submitting any scientific work** that has been AI-generated or reworked in any way and presented as your own research work to ATLAS.
2. Using AI as a substitute for your own research findings and ideas, research discussions, suggestions, recommendations for practice, future research.
3. Non declaration if AI has been used to edit or refine your research document in the completion of abstract work for conferences or any paper submissions in an ATLAS call.
4. Ignoring Intellectual Property and Copyright Law

PLEASE NOTE:

Using any form of Artificial Intelligence for any ATLAS submissions without any acknowledgement in the submitted document is not permitted and will be regarded as academic misconduct. Any use of AI for grammar or editing must be clearly stated at the end of the work submission.

Adopting AI-generated results in their literal or slightly modified form and presenting them as one's own scientific output is considered scientific misconduct and plagiarism.

The author is always responsible for the written text output; this responsibility cannot be transferred to AI.

ATLAS accepts the following uses of Generative Artificial Intelligence:

1. Using GenAI tools to gain improvements to general writing skills while being conscious of the platforms that you are using in terms of GDPR, Intellectual Property and Bias concerns of those platforms.
2. Exploring ideas for research and research areas.
3. Summarise large volumes of data while being conscious of GDPR, Intellectual Property and Bias concerns while using any of the GenAI platforms

PLEASE NOTE:

Declaration of any of the above uses is mandatory including the platform used.

On behalf of the ATLAS Board
Dr Angela Wright MTU
